Subject: (b) (6) Contact

Katrina,

I've been in contact with a friend of (b) (6)

(b) (6) is a member of the Creek Nation and is deaf.

Written communication would be a good way to initially contact her about the sampling, etc.

She visits the library in Bristow almost daily and can check her email there.

I informed her friend that she (b) (6) would be receiving an email from you.

Her email address is:

(b) (6)

Thanks

Todd Downham

(b) (6) my name is Katrina Higgins-Coltrain and I am the Environmental Protection Agency project manager for the Wilcox Superfund Site. I have been working with Todd Downham of the Oklahoma Department of Environmental Quality over the last month to get a better understanding of the site as well as the concerns of the community.

It is my understanding that you live just north of the Wilcox Oil Company Superfund Site and may have concerns about the site and your property. I am sending this email to ask if you are interested in having your yard sampled. You may be familiar with the sampling effort we did at one of your neighbor's properties. Based on the size of your property, we will grid it into sections. Then, we will collect soil samples from within each of these sections and send these samples to the laboratory. When we have the results, we will provide you with a copy and discuss them with you so that we can answer any questions you may have. In order to sample your property, we will need a signed consent for access. I have attached a blank form for your review (blank access agreement.pdf). If you are interested, you may sign and mail it back to me, or if you prefer to use email you may send it that way.

You may also be contacted by Diane Stevenson, Inter-tribal Environmental Council (ITEC) to discuss this with you. I have copied her on this email.

Attached for your information is some site literature that describes the site and also describes the Superfund Process. I have also attached some health fact sheets (ATSDRToxFAQs) on the contaminants we know to be present at the site.

Additional site resource links.

Please do not hesitate to contact either Todd or I should you have questions or concerns about the site or your property.

Thank you for your time and continued interest in the site.

Subject: RE: Wilcox Oil Company Superfund Site

Diane,

My email to (b) (6) was not intended to bypass any assistance from you. My understanding from talking with Todd, ODEQ, is that he had a conversation with (b) (6) friend and that they were expecting some literature about the site. You are correct about the slow progress of Superfund; however, since residents have expressed concern we are eager to address this concern through the sampling of their property. We can do this under our removal authority much quicker than under our remedial process. As a tentative timeframe, we are looking at the end of April beginning of May to be out there to do the sampling.

Please let me know how we can assist you in this process. I do not wish to cause undue stress or angst. If we are contacted again by (b) (6) friend, we will talk with her and also provide her with your contact information.

Thank you for your concern and interest in the site.

Ms. Coltrain,

Please allow more time for me to reach the people I need to talk to. I will help you speak with (b) (6) if you give me a chance. We are all busy with numerous projects. These things take time.

Superfund is a slow process.

Geologic time passes at a slightly slower rate. B-)

Diane
